

ANNAMALAI M

DevOps Engineer

Annamalai98423@gmail.com | 9751937742 | Pudukkottai, India 622003

PROFESSIONAL SUMMARY

Results-driven DevOps Engineer with 3+ years of experience automating cloud infrastructure, managing CI/CD pipelines, and delivering enterprise-grade application deployments. Currently leading banking application deployments for the eSAF Project at Kyndryl (via MetricsNumero), coordinating 45+ vendor integrations. Proficient in AWS, Azure, Docker, Kubernetes, Terraform, WebLogic, and Linux. Proven track record in security compliance, SSL certificate management, and cross-functional collaboration.

TECHNICAL SKILLS

Cloud & IaC: AWS (EC2, S3, Lambda, IAM), Microsoft Azure (VNet, AAD, RBAC), Terraform
CI/CD & DevOps: Jenkins, GitLab CI/CD, GitHub, Docker, Ansible, Full Pipeline Automation
Middleware: WebLogic, Apache HTTPD, Nginx, Apache Tomcat
Operating Systems: RHEL Linux, Windows Server
Databases: MySQL, Oracle, PostgreSQL
Monitoring & Tools: Grafana, PuTTY, WinSCP, Application Workflow Management
Security: SSL Certificate Management, Access Controls, Audit Compliance, Banking-Grade Security **WORK**

EXPERIENCE

Deployment and DevOps Engineer

07/2025 – Present

MetricsNumero (Payroll) | Kyndryl – ESAF Project | Chennai, India

- Lead end-to-end application deployment and workflow management for the eSAF banking project (StratoNeXt) under Kyndryl, ensuring high availability and compliance.
- Deploy and maintain banking applications covering loan payments and security modules, adhering to stringent enterprise and regulatory standards.
- Coordinate and manage integrations across 45+ vendors, ensuring seamless connectivity and minimal disruption to banking operations.
- Oversee deployment pipelines and release management, aligning with enterprise DevOps standards and change management processes.
- Implement banking-grade security best practices including access controls, audit compliance, and certificate management.
- Collaborate with cross-functional teams and vendor partners to resolve deployment issues, reduce downtime, and streamline release workflows.

DevOps Engineer

10/2023 – 06/2025

Thapovan Info Systems | Chennai, India

- Designed, implemented, and maintained full CI/CD pipelines using GitLab, enabling seamless integration and automated application deployments.
- Configured and maintained web servers for multiple client hosting environments, achieving a 30% reduction in downtime and 20% improvement in page load times for G-Square Booking Board.
- Managed renewal and compliance tracking for 50+ SSL certificates, maintaining 100% adherence to security standards.
- Automated server provisioning and deployment workflows, reducing manual intervention and accelerating release cycles.
- Monitored infrastructure performance using Grafana dashboards, proactively identifying and resolving bottlenecks.

DevOps & Cloud Intern

06/2023 – 09/2023

Thapovan Info Systems | Chennai, India

- Built automated deployment scripts and containerized applications using Docker, reducing environment setup time significantly.
- Configured AWS services including EC2, S3, and IAM for scalable and secure cloud deployments.
- Set up and managed CI/CD pipelines with GitLab to automate build, test, and deployment stages.
- Studied server performance monitoring and resource optimization techniques to improve application reliability.

EDUCATION

B.E. in Electrical & Electronics Engineering (EEE)

Graduated: 05/2023

Saranathan College of Engineering | Tiruchirappalli, India | GPA: 8.1 / 10

CERTIFICATIONS

- Mastering MySQL: Database Creation, Management & SQL Queries — Udemy
 - Master AWS DevOps: Ace the Certification with Realistic Practice Exams — Udemy •
- Master Azure: Become Cloud Ready — Azurelib Academy by Deepak Goyal

KEY ACHIEVEMENTS

- Reduced infrastructure downtime by 30% and improved page load times by 20% through optimized server configuration at Thapovan Info Systems.
- Maintained 100% SSL certificate compliance across 50+ certificates, eliminating security lapses.
- Successfully managed and coordinated 45+ third-party vendor integrations for a high-availability banking platform.
- Built and maintained enterprise-grade CI/CD pipelines supporting multi-environment deployments from development to production.
- Engineered an automated Bash script that aggregates real-time server health metrics and running process details from 50+ servers and publishes a consolidated HTML dashboard report — improving operational visibility and reducing manual effort for the ops team.
- Spearheaded network-level infrastructure tasks including port provisioning, load balancer configuration, and firewall/security group rule management — strengthening network security posture across the ESAF banking platform
